

Remarks

A Terminal Disclaimer is filed herewith relating to U.S. Patent 6,194,661.

Claims 1 and 6 have been amended to overcome the objections of the Examiner.

The title has been changed to make it more descriptive.

It is believed that all the claims as amended are now in condition for allowance and such allowance is hereby requested.

Version of claims with markings to show changes made:

(Note: text within [brackets] should be deleted, text underlined should be added)

- 1) A duplex electrical connector comprising:
 - a) a housing having a cylindrical outbound end, a generally oval inbound end, and an interior channel linking said inbound and said outbound end;
 - b) one or more tubular spring steel cable retainers secured in said inbound end, each of said retainers including a set of inwardly extending tangs to receive and engage an armored cable inserted from said inbound end and guide said cable toward said cylindrical outbound end in a manner that separate cables are advanced to said outbound end without mutual interference, said inwardly extending tangs restricting removal of said cable by force applied on said cable from said inbound end; and
 - c) a tubular spring steel adapter secured to said cylindrical outbound end of said housing, said adapter having outwardly extending tangs[capable of engaging the walls of an access hole in an electrical junction box].
- 6) The duplex electrical connector of claim 1 [that includes] including a viewing window in said housing and a polymeric panel that may be snap fitted into or out of said viewing window as desired.

Docket 1507 (Arlington)

Respectfully submitted,

Auzville Jackson, Jr. 3/29/02
